REFERRAL FORM FOR FISH & SNP ARRAY ANALYSIS - SOLID TUMORS

Ship to:
 Labdia Labordiagnostik GmbH
 Department of Tumor Biology

Zimmermannplatz 10
 1090 Vienna
 Austria

Name and Address of Referring Clinic:

Referring Physician:

Date/Signature:

Patient Data:

Last Name:

First Name:

Sex: male female

Date of birth: Social Security No.:

Report should be send to:

Address:

Phone:

FAX¹:

Patient is in a Clinical Trial: yes no

Study code: _____ Name of Clinical Trial: _____

Time point: _____

please specify (e.g. study-entry, during study: phase/cycle/treatment, end of study, follow up, etc.)

Collection date and time:

Type of specimen: lymph node tumor touch slides

other: _____

If available, your internal labeling/numbering: _____

Diagnosis:

Analysis requested: MYCN-FISH SNP Array other: _____

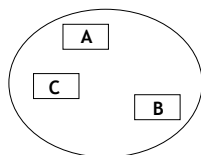

Time elapsed between surgery and processing of tumor in minutes:

Clinical status: newly diagnosed progression relapse regression

Previous therapy: chemotherapy radiation therapy none

Additional remarks:

PROCESSING OF TUMOR TISSUE

Cut tumor into at least 2-3 pieces A, B, C from morphologically different areas.

A, B, C etc. are then cut into 4 pieces

1	2	2, 3, 4 need to be shock-frozen at -70°C or in liquid nitrogen
3	4	

1 Before tumor is fixed in formalin, please prepare 5 touch slides for FISH analysis.

Sampling instructions:

Bisect tumor or lymph node and take two to three 1x1x1 cm (in case of biopsies less) pieces from morphological different areas and label them e.g. A, B, C. Cut every piece of tumor in four smaller pieces: one piece for histopathological analysis and to perform touch slides (1) and three pieces shock-frozen (2,3,4). Please send the touch slides in break- and leak-proof container and the frozen tumor on dry ice according to international packaging and shipping regulations for biological specimens to:

Labdia Labordiagnostik GmbH
 Department of Tumor Biology
